Inspection			
System	Standard	Pass	Fail
Roof Drains	Roof drains and leaders Roof drains should not be connected to the sanitary sewer but should discharge to the ground outside of a building. If the roof drains are connected to the sanitary sewer, disconnect them, plug any open connections to the sanitary sewer using a non-shrink permanent material, and redirect the roof drains onto the ground outside the building.		
Foundation Drains	Foundation drains are underground pipes that collect storm water from around the base of a building and into a sump basket, where it is then pumped outside of the building. Foundation drains should not be connected to the sanitary sewer.		
Sump Pumps	Sump pumps are designed to capture surface or ground water that enters basements or crawl spaces and pump it away from the house. The basic sump system includes drain tile, a sump pit, a sump pump, a float or switch, and a drain line. Sump pumps should not be connected to the sanitary sewer.		
Sewer Service Line	Sanitary Sewer Inflow & Infiltration (I/I) Compliance Inspection Sanitary Sewer Lines. All sanitary sewer lines serving Property, from the house to the main line, shall be in a safe and functional condition and shall be free from all leaks, failures including but not limited to partially collapsed sections or tree root intrusion. The sanitary sewer lines shall meet the City Code standards and specifications. (Details on back of this sheet)	✓	
Notes:	Review of the video submitted of the sanitary sewer line looked to be in compliance through the 183ft that was scoped. The City of Orono passes this inspection based on the length of pipe we can see but cannot guarantee anything past the point that was unable to be reached. - Jimmy Nelson, Supervisor of Sewer and Water		
Toilet Removed For Inspection:	o Yes o No
